

Jerrod Keuler
Chief Estimator at PCL Construction Management Inc.

With a degree in Architecture Jerrod has twenty-four years of industry experience and has been responsible for drafting and project management on various projects, as well as working as a Project Manager and Chief Estimator. He loves construction and has always liked seeing things get built since childhood. He has worked on projects ranging in size from several thousand dollars up to 90 million dollars. Some of the project highlights of his career have been working on Regina City Square, the dome rehabilitation for the Saskatchewan Legislative Building and the student residence towers for the University of Regina. In the past he has been the construction industry representative for the United Way of Regina and has spent the past year on the RCA Board of Directors. He looks forward to the opportunity for a full term as a Board member for the RCA. He likes to figure out puzzles and everything in construction is a bit of a puzzle, and this kind of thinking is a valuable addition to the Board.
