

Michael Bzdell
Project Manager for Alliance Energy Ltd.

Michael grew up on a farm and realized early in his career that he preferred working with his hands, so office work wasn't for him. Starting his career as an electrician, Michael has worked for Alliance Energy for twenty six plus years. He joined the RCA Board of Directors to further build relationships with other contractors, generals and suppliers. Being able to meet these people and getting to know the person on a more personal level makes it easier to have business conversations. A big focus at Alliance is promoting a positive company culture through training and positive attitudes, which has led to them winning multiple industry awards.
